CAM[®] Gauge Rake

Assembly Instructions

Tools Needed for Assembly:

- 7/16" wrench (two)

Parts Shipped with Unit:

- Head assembly
 - Threaded handle adapter or aluminum handle (not pictured)
 - Gusset brace (set of 2) – one gusset is labeled
 - Bolt bag for braces
- CAM[®] sets are ordered separately and may or may not be shipped with this unit*

Gusset Brace Instructions:

1. Slide slotted handle or threaded handle adapter over the center hole on the aluminum frame.
2. Position labeled gusset on bottom of handle/adapter, and the other gusset on top of the handle/adapter as shown.
3. Insert the two longest bolts through the top gusset, the handle/adapter and the bottom gusset. Insert the two shorter bolts through the two remaining holes on the frame.
4. Tighten all nuts, being careful not to over-tighten. Over-tightening hardware may result in crushing the handle, thereby compromising its strength.

CAM[®] Assembly:

1. Remove the wing nut and loc washer on each end of the head assembly.
2. Place the CAM[®] on the head, as shown, followed by the loc washer. Secure with wing nut. Do the same on the opposite end of the head.
3. ***Make sure CAM[®] striking surface is in line with screed edge, as pictured.***

FULL WARRANTY

All Seymour Midwest products carry a full warranty against manufacturer defects in quality and workmanship. Products which have been abused or worn out from normal use are excluded from this warranty. We reserve the right to replace or issue credit on an individual basis.
